

Coded Note Number: **LI119**

Revision: **C001**

Date: **October 26, 2016**

Title: **Assembly Record for Level I Assemblies or Subassemblies**

In addition to test report requirements, an assembly record shall be provided for each assembly or sub assembly shipped:

1. signed and dated by an authorized representative, and
2. traceable to a unit serial number marked on the major pressure boundary part of the assembly or sub assembly.

NOTE:

One assembly record is sufficient for multiple serial numbers when all of the assemblies are manufactured from the same heat-lot for each of the piece parts making up the assembly.
