

Coded Note Number: **MK102**

Revision: **C001**

Date: **November 2, 2018**

Title: **MARKING REQTS: LEVEL I PIPE FITTINGS**

1. All markings on this Purchase Order (PO) item shall be applied in accordance with MIL-STD-792 Revision F. These markings shall be legible and located so as not to affect the form, fit, or function of the fitting.

2. The information required by the applicable fitting specification and the following information shall be permanently marked on this PO item:

2.1. Material Code. The applicable material designator (material code) from the list below:

SAE – CRES 304 (Alloy S30400)

SAH – CRES 316L (Alloy S31603)

STB – Carbon Steel

INA – NICKEL (INCONEL, Alloy N06600)

INE – NICKELMOB (INCONEL, Alloy N06625)

NCF – NICU (MONEL, Alloy N04400)

These material codes shall be used in lieu of any other material codes, generic or industry, including material codes which may be required by individual material specifications.

2.1.1. If there is no applicable material code listed above for this PO item, submit a Vendor Information Request (VIR) for the appropriate material code.

2.2. Traceback ID. The Traceback ID shall be a marking that provides traceability to the objective quality evidence for the item and to manufacturing tests and inspections performed on the item or on sample items from the same heat and lot. The Traceback ID shall correlate to the certification documentation.

2.3. Manufacturer's ID. The Manufacturer's ID shall be a marking that represents the manufacturer's company name, trade name or trade symbol number.

2.4. Purchase Order ID. At the option of the Supplier where space permits, the Purchase Order ID shall be a marking identifying the applicable NNS PO and PO item number.

3. The Supplier's Quality inspection system shall support the application of the markings above in accordance with Appendix Q-DoD.
