Title: **RADIOGRAPHIC TEST (RT) RECORDS FOR TY-WX NNS CUNI B16.9 FITTINGS**

Radiographic Test (RT) records for all welds in this Purchase Order (PO) item, including those in the welded tubular products used to make this PO item, are required to be sent to Newport News Shipbuilding (NNS) for approval prior to the material shipment, unless authorized by NNS.

1. General Radiography Requirements. The requirements for radiographic inspection in NAVSEA Technical Publication T9074-AS-GIB-010/271 are supplemented by the following:
  - 1.1. Radiography of more than one fitting per film is prohibited.
  - 1.2. The following identification shall appear on each radiograph, as a result of exposure of the film:
    - a) RT serial number or code for the particular component.
    - b) Film location markers.
  - 1.3. Date of exposure shall appear on each radiograph, either by exposure or by punching.
  - 1.4. Identification of the organization making the radiograph shall appear on the reports accompanying the radiograph submittal.
  - 1.5. Radiography of a repaired weld area shall be in accordance with the same technique used for original radiography. Radiographs shall be identified with the same serial number or code used for original radiographs followed by the letter R and a numeral 1, 2 etc. to indicate the number of times the weld area involved has been repaired.
2. RT records. The Supplier shall submit the following RT records for this PO item to NNS for approval upon completion of radiographic inspection:
  - a) All radiographs, original and of any weld repairs.
  - b) A Set-up sketch showing the basic parameters used to radiograph the weld(s) (source placement, film placement, back filter placement, penetrometer and shim location, location marker placement, lead letter "B" location).
  - c) Radiographic inspection reports signed by the radiographic inspector.

2.1. The Supplier shall identify the PO number and PO item number on the outer wrapping for all shipments of radiographs and radiograph inspection reports. The following identifying information for each set of radiographs shall be included in the shipment:

- a) Description (name) of fitting
- b) PO number, PO item number, and material number (NNPN)
- c) Drawing number(s), which show welded joints requiring RT.
- d) Radiograph identification number.

2.2. The Supplier shall submit Radiographs in a waterproof envelope or container.

3. Submittal Directions. All RT records shall be submitted to NNS by mail:

Newport News Shipbuilding (NNS)  
4101 Washington Ave.  
Newport News, VA 23607-2770  
ATTN: RT Interpretation Section  
Dept. O37 Bldg. 167/1
