Qualification Test/First Article Inspection Test/Preproduction Test/First Unit Examination Test/Design Reports for approval for tests/deliverables required by the equipment specification/drawing.

The purchase order number, item number and applicable drawing number shall be indicated on the reports. Test reports must be received by the Purchaser within 30 days after completion of the tests. Design Report must be received by the Purchaser prior to manufacturing.

Should this equipment have been designed and tested in accordance with the above requirements, detailed proof with navy approval letter, where navy approval is required, is to be forwarded for Purchaser acceptance and file within 30 days after receipt of this order.

For the following, only completion of NN Form 4790 is required:

- 1) Material/equipment listed on the applicable Qualified Product List (QPL).
- 2) If the applicable Qualification Test/ First Article Inspection Test/Preproduction Test/ First Unit Examination Test/Design Report including current revisions have been previously approved by the Purchaser, submittal and approval of Form 4790 will fulfill this requirement.
