

Coded Note Number: **Y2600**

Revision: **C001**

Date: **May 15, 2015**

Title: **Complex/Critical Part (C/C)**

This part is designated by the Purchaser as complex/critical (C/C). It requires an increased level of assurance that all technical requirements and certifications are understood and satisfied. The Purchaser shall perform (at Purchaser's option) a rigorous technical assessment of the Supplier's capability, understanding, and experience prior to (or after) Purchase Order award, including but not limited to the following areas:

- program/project management
- technician/craftsmen qualifications
- work control processes
- material control processes
- manufacturing controls (planning, machining, fabrication, etc)
- sub-tier supplier oversight/management
- welding and inspection qualifications
- quality management system
- final assembly
- testing and certification

The Purchaser will schedule a pre-award meeting to discuss requirements and detailed expectations, at Seller's convenience. Purchaser will hold (at Purchaser's option) a Kickoff meeting upon award of the Purchase Order.

The Purchaser will contact the Seller to initiate and set up actions required to satisfy C/C requirements. Seller requests for a pre-award meeting or other questions/actions regarding these C/C requirements shall be addressed to the Supply Chain Procurement Buyer.
