

Marking of a minimum of six (6) dots approximately 0.032" diameter, raised or depressed, approximately 0.010", shall be placed on the head of self-locking headed fasteners (e.g., bolts, screws, etc.) and on the marking end of self-locking non-headed fasteners (e.g., studs). For headed fasteners, markings on top of the head is preferred but can be placed on the side of the head if necessary.

This marking requirement is only required for headed fasteners that are 1/4-inch in diameter or larger, and for non-headed fasteners that are 3/8-inch in diameter or larger.
